~~2221~~ = passed a very crowded  
population = men called  
us to land to be fleeced  
and insulted by way of  
Mohonga or mutuari = they

threw stones in rage and  
one apparently slung  
lighted close to the canoe  
We came on until after dark  
and landed under a cliff

came and made enquiries  
Then a few more came as if  
to enquire more perfectly  
told us to sleep & tomorrow  
friendship should be made  
Put luggage on board and  
set a watch on cliff - a  
number of men came along  
cowering behind rocks which  
then aroused suspicion

[0007]

and we slipped off quietly  
They called after us as men  
balked of their prey - We  
then went on 5 hours &  
slept - then this morning

and not the way he

not the smallest doubt  
but Tanganyika discharges  
somewhere though we

I have noticed for  
many years in singing

hawks and singing  
birds are a sign that  
a village is near -  
considering how the  
large game are killed

Further from Dr. Livingstone.

London, Aug. 29. Dr. Kirk of Zanzibar writes that  
Dr. Livingstone is still in the country west of the  
Tanganyika and the Arabs there count him as a resi-

dent. In that region no feeling is manifested toward him. He is moving slowly but safely, and will leave no doubts in the geographical problem whether Lake Tanganyika is the real head of the Nile, or whether it empties by the Congo.
